

COMFORT CREATOR FOR HOME CINÉMA

For over 15 years, CcomOciné has stood out in the design and variety of seating, decorations, and accessories for private cinema rooms. In 2016, to fully ensure the quality of our products, we took complete control of our production by establishing our own workshops in the heart of southeastern France. Since then, all our seating, decorative elements, and layouts have been entirely made in France. We place the utmost importance on the quality and origin of our raw materials, which we primarily source in France. When necessary, we explore European or international sources. We would be delighted to welcome you to our workshops and showroom in Saint-Rémy-de-Provence to share our expertise and craftsmanship with you.

The AsLord Création Brand Our commitment to excellence in motorized seating has driven us to fully invest in the luxury home cinema segment. This dedication gave rise to our new brand, AsLord Création by CcomOciné, embodying the spirit of bespoke craftsmanship and advanced customization. Each collection offers a unique style, perfectly suited for creating private home cinema rooms. The dedicated website for AsLord Création's premium motorized seating is currently under development. In the meantime, we invite you to explore our full range on the CcomOciné website.

### The "Made in France »

When we talk about a "cinema chair made in France," we imagine a workshop or factory in France, with specialized machines and artisanal or industrial techniques carried out by qualified professionals. However, the legislation allows the use of terms such as "fabricated in France," "produced in France," or "Made in France" even if only part of the manufacturing process takes place in France. This flexibility enables certain companies to claim French manufacturing even when the product has undergone only minor, or sometimes no, transformation on French soil. This becomes even more complex for consumers to verify, particularly in online commerce, where descriptions can be ambiguous, even misleading, and limited to a few photos. Nevertheless, there are several ways to verify this information more reliably. Thanks to advanced search engines, the "image search" function makes it easier to identify the country of origin for certain chairs, especially motorized ones. By consulting platforms like Alibaba, which hosts a vast majority of Chinese manufacturers, it is possible to find identical products. If a photo matches, it is likely that French or European companies presenting themselves as "manufacturers" or "designers" are actually sourcing their products from China. These companies often simply import and resell these chairs while applying substantial margins. Furthermore, they may face difficulties in providing quick and efficient after-sales service (SAV)..

### La French Fab: The Flagship of France's Dynamic Industry

La French Fab is a non-commercial brand that unites companies, such as CcomOciné / AsLord, sharing the values outlined in its manifesto.

This collective aims to highlight and promote French industrial expertise, both nationally and internationally.

As a member of La French Fab, our company is committed to adhering to the following seven principles: Innovation / Modernization / Adaptation / Ecological Responsibility / Internationalization.

# THE MOTORIZATIONS

Whichever "class" (motorization) is chosen, the dimensions of the selected seating model remain unchanged. This way, you can have multiple types of motorization within the same row of seats.

To optimize the comfort of our seating, we have selected the specific BW motorization, also known as "BackWall." This motorization offers two significant advantages:

When the motorization is activated, the seat glides forward, and the footrest extends to 40%, providing a semi-reclined position. Then, the backrest tilts for the full deployment of the seating.

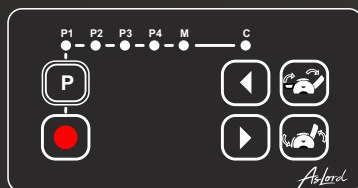

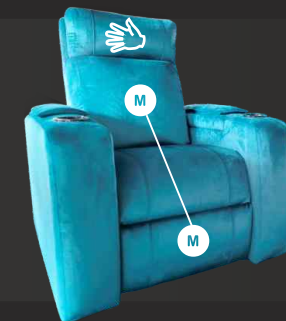

The BW motorization allows the seating to fully recline while requiring only 15 cm of space behind it, maximizing the layout of your home cinema with its "wall-hugger" design concept.

Class SÉLECT

## SÉLECT ★

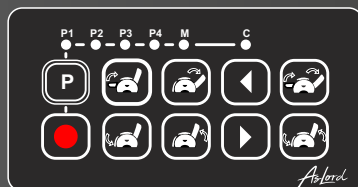

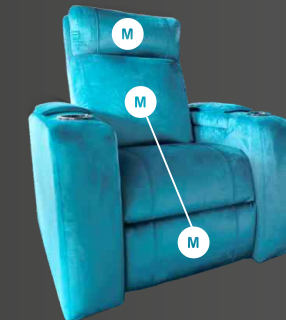

Simultaneous BW motorization of the seat/footrest and backrest  
 Silent motorization  
 MANUAL headrest  
 Quick return button to the initial position  
 Backlit touch-sensitive remote control

Class PREMIUM

## PREMIUM ★★

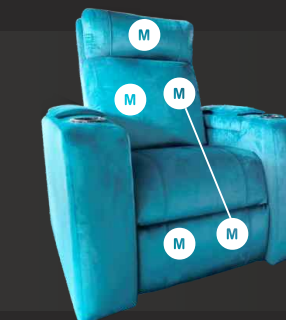

Simultaneous BW motorization of the seat/footrest and backrest  
 Silent motorization  
 MOTORIZED headrest  
 Quick return button to the initial position  
 Backlit touch-sensitive remote control (LED color selection)  
 Memory function for 3 positions, including the headrest  
 Automatic return to the initial position after 10 minutes without presence  
 Safety features: remote deactivation and seat sensor in the absence of presence

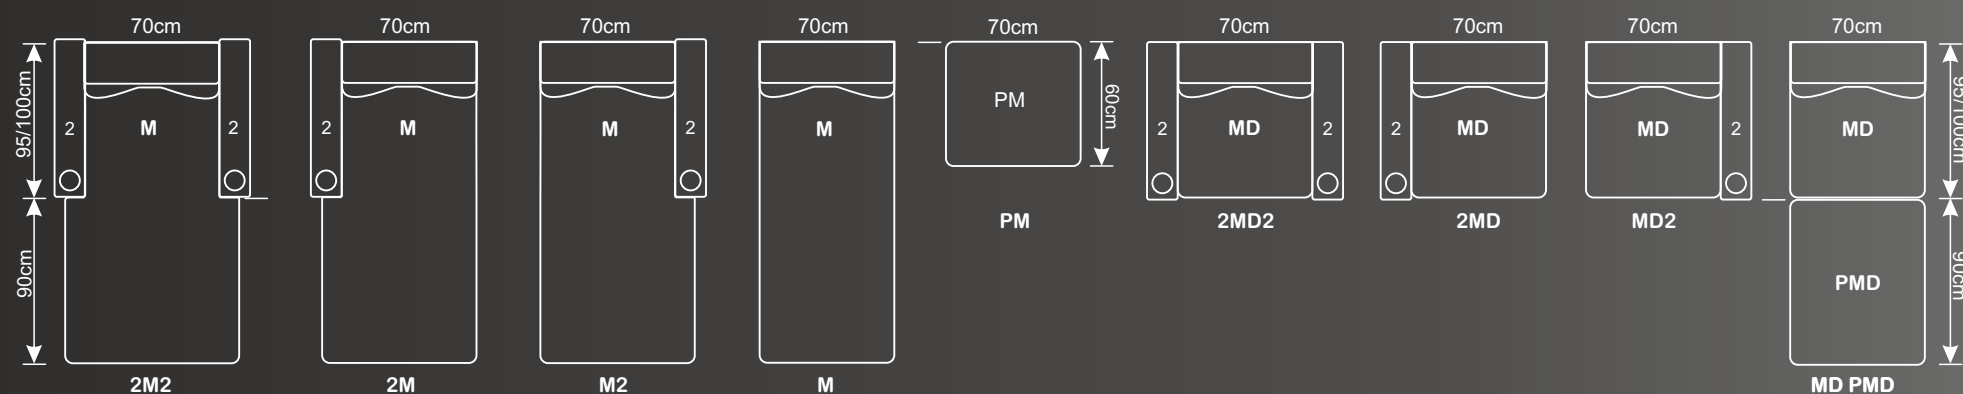

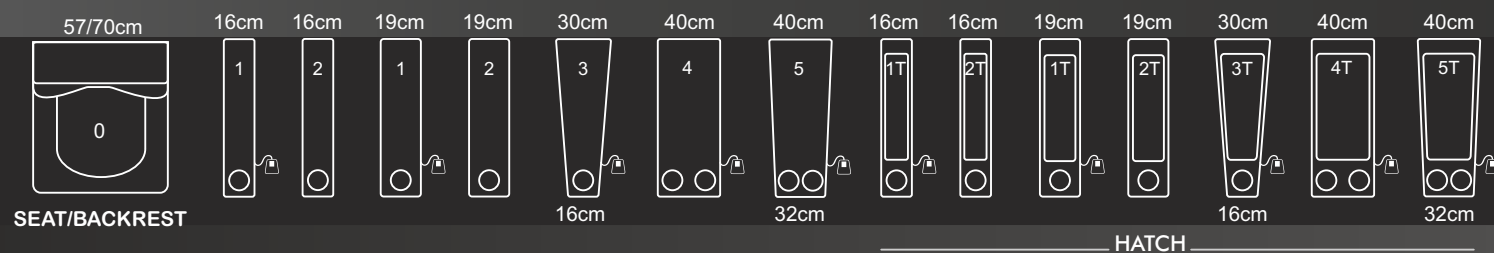

Class ÉLITE

## ÉLITE ★★★

Dual BW motorization with 3 independent controls:  
 -Reclining backrest  
 -Seat/footrest  
 -Simultaneous operation of seat/footrest and backrest  
 +All the features of the Premium Class

# THE UPHOLSTERY

We offer a wide range of coverings, carefully selected to combine quality, durability, and aesthetics. These coverings adapt to various styles and atmospheres, enabling complete customization.

For projects requiring an even higher level of customization, we offer our clients the option to upholster our comfort range with a fabric of their choice, beyond our standard collection. This flexibility allows us to meet the most demanding expectations and deliver a tailor-made result perfectly suited to each project.

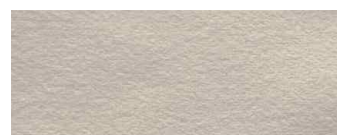

**Dolce and Rokeo Collection Fabrics:** Our fabric ranges, treated with the TEXGUARD process, provide long-lasting protection that preserves their like-new appearance over the years and effectively resists wear and tear. This treatment extends their lifespan while making daily maintenance easier, especially for cleaning accidental stains, all while maintaining their original quality and texture.

**Valencia and Urban Imitation leather Collections** With an exceptionally pleasant touch and an appearance close to genuine leather, available in textured or smooth finishes, this faux leather combines aesthetics and comfort. It stands out for its exceptional resistance to light, allowing it to maintain its appearance over time, while offering great ease of maintenance, making it practical for everyday use.

**Panama, Florida, and Nabuk Leather Collections** All our leathers are sourced exclusively from renowned Italian manufacturers known for their expertise. They are treated in compliance with REACH regulations, a framework established by the European Union to ensure enhanced protection of human health and the environment. This rigorous process guarantees high-quality leathers that meet the strictest standards for safety and durability. Notably, all parts of the seating are made entirely of 100% leather.

**Somptuo Alcantara** Certified as authentic Italian Alcantara, this fabric stands out for its elegant aesthetics, unparalleled silky touch, and naturally stain-resistant properties. While imitations may replicate its appearance, they fail to match the refinement or the unique sensory experience that have made the original Alcantara world-renowned.
